

Supplementary Figure 2. The receiver operating characteristics curve created based on the initial ratio of medium choroidal vessel/choriocapillaris layer thickness to choroidal thickness. Blue line represents predictability of the initial ratio of medium choroidal vessel/choriocapillaris layer thickness (MCCT) to choroidal thickness (CT). An optimal cut-off value was 0.18. The area under the curve (AUC) was 0.710, p -value of 0.001.
